Philadelphia, PA (December 4, 2018) Asura Technologies, the new generation LPR and video analytics company developing plug 'n play, camera agnostic, AI-powered data collection systems is proud to announce entering into strategic partnership with Umojo to deliver fully automated, turn-key parking garage management solutions across the United States.

"We are truly happy and excited to enter into a strategic partnership with Umojo sharing the same passion for automation through non-invasive and innovative software solutions. Looking for expansion possibilities in the US we find Umojo a great partner to equip US indoor parking sites with the latest parking technology implementing LPR. I believe that by leveraging on the synergies of Umojo's garage management- and DVS solutions and Asura's LPR and video analytics software we are offering operators an all-round yet still economic, easy-to-fit and truly intelligent parking solution." – says Mate Kiss Gyorgy, CEO of Asura Technologies.

"I believe that delivering ultimate garage automation through combining our IoT and NVR technology-based services with LPR is without doubt a 21st century parking management solution. A software suite that includes Call Center, Garage Incident Management, HD Video, HD Intercom, Analytics, Online reservation integration, Revenue control integration combined with LPR and video analytics-based vehicle recognition is arguably the best in class garage automation platform out there. By focusing on the core needs of automating garages, we provide a complete solution to track issues, notify field personnel, and provide historical reporting and analytics, all via a hosted platform. Our strategic partnership with Asura brings together services that naturally complement each other to provide top-class customer experience on an extremely competitive price level." – adds Rick Neubauer, founder and CEO of Umojo.

Indeed, the solution created with the joint efforts of Asura and Umojo is all about customer focus; a completely software-based garage management platform easy-to-integrate into existing infrastructure delivering customizable reports on-demand. The system has already been put into practice in a pilot project delivering exceptional results in Chicago, Ill.

About ASURA

Asura Technologies is the new generation LPR and video analytics company creating easy to integrate, camera agnostic data collection systems. Our LPR- and video analytics-based vehicle recognition technology is used for parking- and traffic management applications as well as general security and surveillance.

Asura Technologies made its debut with the Asura Recognition Unit (ARU) Plug and Play LPR in 2017 delivering an easy-to-integrate, flexible solution. ARU earned a quick recognition of the traffic management industry exemplified by integration with major parking management systems and earning a Special Mention at 2018 Intertraffic Innovation Awards.
